Attach color digital photographs of the site and SCMS including a caption describing each photo.

## Additional Comments

**REMEMBER TO SCORE THE SCM ON THE FIRST PAGE OF THE REPORT!**

### Professional Certification

*Certification shall be provided by a registered North Carolina Professional Engineer or Landscape Architect with qualified professional Stormwater Control Management (SCM) Inspection and Maintenance training.*

*Placement for professional seal*

**Date of Inspection:** \_\_\_\_\_

**Name of Certified Inspector:**

\_\_\_\_\_

**Certified Inspector's Signature:**

\_\_\_\_\_

# Durham County Stormwater Ordinance

## Sec. 14-160. Operation and Maintenance of Stormwater Control Measures

(d) SCM Inspections. Upon completion of construction, the owner shall have the SCMs inspected by a registered professional engineer, registered land surveyor, or registered landscape architect. If any deficiencies in the SCM are found, those deficiencies shall be corrected, and the device shall be re-inspected, and this process shall continue until the SCM is found to be without deficiencies.

Between September 1 and December 1 of each of the following years, the owner shall have the device inspected by a registered professional engineer, registered land surveyor or registered landscape architect. If any deficiencies in the SCM are found, those deficiencies shall be corrected, and the device shall be re-inspected, and this process shall continue until the SCM is found to be without deficiencies.

The owner shall transmit all inspection reports to the County in accordance with the procedures found at: [Durham County | Stormwater](#) After the owner submits the SCM inspection report, the County shall review it within 30 calendar days. If the inspection report is complete and correct, the County shall approve it and notify the owner that the annual inspection requirement has been met. If the report is deficient, the owner shall be required to correct the deficiencies and resubmit the report

The inspection report shall contain all of the following items:

1. The name and address of the owner;
2. The recorded book and page number of the lot of each SCM;
3. A statement that an inspection was made of all SCMs;
4. The date the inspection was made; and
5. The original signature and seal of the registered professional engineer, registered landscape architect, registered architect, or registered surveyor.
6. Identified deficiencies, if any, with location and description of deficiency provided. If deficiencies require repair, deficiencies must be corrected in order for the inspection report to be approved.
