The physical design and introduction of direct supervision to the James A. FAMILIAR FACES INITIATIVE

Led by the National Association of Counties (NACo), the Familiar Faces Initiative (FFI) supports communities in building and share data and integrate care options between health and justice systems so they can intervene earlier, improve outcomes and reduce incarceration and hospitalization rates. Data-sharing allows communities to identify people who need help and connect them with the right services to address behavioral health needs and, ultimately, break the cycle of justice system involvement and hospital usage. For more information visit <https://familiarfaces.naco.org/>.

MODEL PEER LEARNING SITE

Orange County, California is a member of a small cohort of FFI peer-learning sites which served as examples for jurisdictions looking for innovative and impactful places to emulate in their efforts to address the needs of familiar faces. As an FFI peer learning site, Orange County provides the FFI community with the opportunity to engage with a mentor they can learn from while instituting a familiar faces data-sharing strategy and accompanying program.
