

Fentanyl is 50 times stronger than heroin. You cannot smell or taste it. Just a tiny amount can cause overdose and DEATH.

Public Health

WARNING!

PEOPLE ARE DYING OF FENTANYL POISONING

If you use illicit drugs, fentanyl could be hidden in ANY DRUG you take without you knowing.
No source is safe.

Fentanyl is being mixed into many drugs sold on the street and online, including: Cocaine, Crack, Meth, Xanax, MDMA, Heroin, Oxycodone pills, Percocet pills & others.

If you choose to use drugs, TIPS FOR SAFER USE:

Test Your Drugs Before Using with fentanyl testing strips.
Start Low and Go Slow by using a small amount first to see how you feel.

Watch and Wait before using more.

Carry Naloxone/Narcan and be prepared to use this medication to reverse an opioid overdose.

Always Use with Others so they can help you if you overdose.

You can get **FREE** Naloxone and Fentanyl Testing Strips at the
Durham County Department of Public Health Pharmacy.
